World TB Day, 2014

BACKGROUND:

Introduction to National TB Control Program:

WHO declared TB a global emergency in 1993. Since then efforts have been made to expand partnerships and bring all stakeholders on board in order to control this disease more effectively. The National TB Control Program Pakistan (NTP-PK) is running as the largest health program in the public sector across Pakistan.

Pakistan, in alliance with provincial programs a TB control program is running. Government of Pakistan and other partners are supporting this programme. The most important supporter in this regard is the Global Fund. With the support of Global Fund and WHO around 1500 laboratories and 5000 treatment sites have been established where free of cost treatment facilities are provided.

The overall objective of NTP is to reduce mortality, morbidity and disease transmission so that TB is no longer a public health problem. NTP Ministry of National Health Services Regulations & Coordination developed a comprehensive strategy for control of Tuberculosis in the country. The strategy focuses on expansion and consolidation of Directly Observed Treatment Short Course (DOTS) services in the country.

A well-coordinated surveillance system is in place for prompt response to drug or chemical shortages in these centers. As a matter of fact, in order to empower TB patients to demand their right to free treatment and diagnosis.

Global Situation:

Tuberculosis (TB) is an ancient infectious disease caused by an organism Mycobacterium Tuberculosis, which was discovered by Robert Kochs in 1882. Although it can attack any part of the body, the organism mostly affects the lungs, causing pulmonary TB.

The highest incidence is seen in those countries of Africa, Asia, and Latin America with the lowest gross national products. WHO estimates that eight million people are infected with TB every year, out of those 95% live in developing countries. An estimated 3 million people die due to TB every year.

The emergence of resistance to first line anti-tuberculosis drugs, and particularly of multidrug-resistant TB (MDR-TB), has become a major public health problem in a number of countries, and an obstacle to effective global TB control.

TB Situation in Pakistan:

Pakistan ranks 5th among the 22 high burden countries. The Number of TB cases diagnosed was increased from 20,707 in 2001 to 268,780 in 2010. Since the revival of the program in 2001, NTP has successfully treated more than 1.5 million TB cases free of cost. Current case detection rate of new smear positive TB cases is 75% and treatment success rate is 91%.

Advocacy, Communication & Social Mobilization (ACSM):

ACSM is a key determinant of the outcomes of Pakistan’s TB control interventions. It is through the use of ACSM tools that agendas are set, public awareness on specific health issues is raised and communities are mobilized to adopt early health seeking behavior and treatment adherence. ACSM Unit has demonstrated leadership in designing, planning and executing ACSM interventions and further institutionalizing health communications for TB in the country. Vision of eliminating differential of quality of “health communication” products, services and information between public and private sectors has been introduced. NTP, Pakistan is being recognized as a leader on producing high quality advocacy, communication and social mobilization products.

Numbers of national strategic/policy documents have been produced under ACSM, including National ACSM Strategy and Operational Guidelines; National M&E Framework; Quality Assurance Manual (Trainer and Trainee guide) for IPC; Social Marketing Plan; ACSM Resource Center Development Guidelines; and National Logistic & Management Information System.

WORLD TB DAY:

World TB Day is commemorated every year in the month of March. The day is designed to build public awareness that tuberculosis today remains an epidemic in much of the world, causing the deaths of several million people each year, mostly in the third world.

National TB Control Program & World TB Day 2014:

Every year National TB Control Program (NTP) implements a number of activities to commemorate World TB Day in the month of March.

This year the campaign will focus on “Reach the three million”: A TB test, treatment and cure for all. As highlighted in the WHO 2013 Global TB Report, three million people are missed every year by health systems. This has been the case for six years now.

We all strongly believe that no one should be left behind in the fight against TB if we want to move towards a ZERO TB deaths world. So for World TB Day 2014, we call for a global effort to find, treat and cure for people with TB and accelerate progress towards the bold goals we expect to see in TB strategies post-2015 and world with Zero TB deaths, stigma and infections.

We hope that this theme will act as a rallying call for us all; offering key stakeholders, national TB programs and community groups the opportunity to show how they will contribute to this global goal. The campaign challenges us to look at the fight against TB in an entirely new way: that every step we take should be a step that counts for people and will lead us towards TB elimination.
HIGHLIGHTS OF THE ACTIVITIES CARRIED OUT IN CONNECTION WITH THE WORLD TB DAY 2014

National Level

Consultative Meeting with Partners: In order to develop a national plan to implement special activities to commemorate World TB Day, a consultative meeting with partners including Mercy Corps, ASD, ACD and Provincial TB Control Programs was organized. The objective of the meeting was to develop strategies for the implementation of activities on World TB Day. The meeting also helped in the development of uniformed message for the campaign, IEC material, development of a comprehensive work plan to commemorate World TB Day.

A National Seminar on Tuberculosis

A national seminar to commemorate World TB Day was organized on 25th March 2014 at Pakistan National Council of Arts.

Mrs. Saira Atzai Tarar State Minister for National Health services Regulations & Coordination was the chief Guest on the occasion. Dr. G. N Kazi National Professional Officer WHO, Dr. Warner Buehler Senior Fund portfolio Manager Global Fund, Ms. Nancy Estes Acting Mission Director USAID Pakistan, Dr. Ejaz Qadeer, National Manager, National TB Control Program, Mr. Ateeb Sadic Assistant General Secretary Pakistan Red Crescent Society, were also present on the event.

Key stakeholders including bilateral and multi-lateral donors, National and International NGOs, policy makers, development partners, academia and media actively participated in the seminar. The salient features of the event are as follows:

- **Recitation from the Holy Quran:** On the occasion of World TB day Seminar, 2014 at PNCA Islamabad Muhammad Arif of Boys Scout Association recites from the Holy Quran. In addition, he committed full support of national scouts in the fight against TB.

- **Remarks by Chief Guest:** Hon. State Minister for NHSR&C Ms. Saira Atzai Tarar said that she is pleased to be part of World TB Day's commemoration today and glad to see so many young faces whose presence itself is the achievement of today's event. The Government of Pakistan is making concerted efforts to control TB in Pakistan. I believe that we as a nation can help in disseminating such information regarding tuberculosis among our communities. She also appreciated the efforts of the National TB Control Program in the fight against TB and said that she is very confident about the capabilities of the team leader.

- **Welcome Remarks by Dr. Ejaz Qadeer, Manager National TB Control Program:** Dr. Ejaz warmly welcomed all the participants and gave an overview of the disease and this year's theme “Reach the three million”: A TB test, treatment and cure for all”. To reach the three million and move towards zero TB deaths, infections, suffering and stigma, we must aggressively scale up TB programs, especially for the most vulnerable groups and in hotspots, while investing in research and development for the new tools that we urgently need. The campaign challenges us to look at the fight against TB in an entirely new way: that every step we take should be a step that counts for people and will lead us towards TB elimination.

- **Remarks by WHO Representative:** DR. G. N Kazi esteemed the efforts of NTP on appealing TB Patients and providing them a policy for communicating their views. He added that, TB is the leading cause of death for people living with HIV & AIDS. DR. G. N Kazi highly valued the efforts of National TB control program Ministry of NHSR&C.

- **TB Patient highlighted his Success Story:** Ms. Zenat Bibi – A cured TB patient while narrating the story of her life told that she was encouraged and was given full support to complete the 6 months treatment when he was declared as a TB patient at PIMS hospital. She not only encouraged the TB Patients to complete the new 6 months treatment but at the same time extended her full voluntary services to National TB Control Program in the fight against TB.

- **Representative of the Global Fund:** Dr. Warner Buehler Senior Fund Portfolio Manager appreciated the efforts made towards the controlling TB. He added that, with support of international and national organizations the NTP soon will be able to reduce TB to a level where it is no longer a threat to the people of Pakistan:

- **Representative of the USAID:** Acting Mission Director USAID Pakistan Ms. Nancy Estes valued the contribution of the stakeholder in eradicating Tuberculosis. She further said that Pakistan ranks 5th amongst 22 high burden countries and it's a challenge for NTP and partners to stretch their arms to better cope with situation and make Pakistan a TB free country. She extended her full support from USAID in the battle in opposition to TB.

- **Representative OF Girls Guide Association:** A 9th class Student of Girls Guide Association Farah Noor expressing her views regarding the current situation of TB in Pakistan and the available free treatment mechanism. She promised full support at school level to engage students of different age group to generate awareness among the general community in the society.

Dissemination of ACSM Resource Material:

ACSM resource and promotional material including posters, writing pads, TB brochures, and leaflets were also distribute among Provincial programs and partners for dissemination among different target audience during World TB Day activities.

In addition, TB caps and tea shirts branded with logo were distributed among the participants of the TB Symbolic Walk on 26th March, 2014.
MoU signing ceremony was structured on 22nd March, 2014 at McDonald’s Fortress Stadium, Lahore to launch a long term partnership between NTP and McDonalds. The MoU signed by the Assistant Managing Director McDonald’s and the National Manager of the TB Control Program. The representatives of the PPM and ACSM were present at the occasion.

The Assistant MD McDonald’s along with their team member warmly welcomed the NTP and appreciated the efforts and innovative idea of partnership. He added that NTP and McDonald’s collaboration Pakistan could be an example for the rest of the world. NTP is the first and only program round the world having alliance with McDonald’s in the fight against TB.

The Assistant MD McDonald’s guaranteed full support in serving the program in their fight against TB. He committed that all the outlets of the food chain will be branded with TB messages during World TB Day campaign, and a special spot for placing information material on TB will also be provided. He added that the staff of McDonalds will be dressed in Stop TB badges during the campaign.

NTP in this regard afforded coupons containing questions related to TB and McDonalds agreed to have a lucky draw ceremony at Islamabad outlet and at least 20 free meals will be hand over to the winners on World TB Day.

Dr. Ejaz Qadeer appreciated the support of McDonalds and said that this will be a unique partnership and will help in disseminating messages on TB especially among youth as TB mostly affects the individuals in productive age group.

Quiz Competition at McDonald’s Islamabad.

The National TB Control Program is making determined efforts to control TB in Pakistan with the support of different partners and actors.

National TB Control program in alliance with McDonalds launched a substantial campaign during World TB Day Campaign 2014. The contributions of McDonalds as partner in the fight against TB are valuable for the cause of TB awareness during the World TB Day Campaign in Pakistan.
Symbolic Walk:

On 26 March, 2014 at 12:00pm a Symbolic TB was held from Football Ground to Press Club F6 Markaz, Islamabad an effort to raise awareness of tuberculosis.

The foundation of TB Walk seeks to raise awareness on the tuberculosis burden in the country. This effort has offered the opportunity to mobilize the political, economic and social commitment for the prevention and control of TB in Pakistan.

The walk was headed by MNA Tariq Fazal Chaudhry, representative of the movement partners Green Star, Mercy Corps, ASD, Pakistan Girls Guide Association, Pakistan Scouts and Islamabad Traffic Police participated in the walk. In addition, the representatives from all the concerned units of the National TB Control Program also took part as fighters against TB worldwide.

All the participants of the Symbolic TB have been provided with TB caps and shirts with logo, streamers, banners and play cards.

Islamabad Traffic Police as Partner in the Fight Against TB

Islamabad Traffic Police (ITP) as partner with National TB Control Program (NTP) in the fight against TB extended full support for the cause of TB awareness during the World TB Day Campaign.

On World TB Day, a special designed float containing messages on TB symptoms and treatment also moved all around the city to disseminate information on the issue.

A special Radio program was also on aired on ITPs official radio station on TB throughout the World TB Day on March 24, 2010. TB related messages were disseminated and a special interview of NTPs representative was also aired live on the channel. The interview covered all related information about the disease and the program interventions.

Dr. Abdul Khaliq Ghauri from National TB Control Program in detail explained the causes and symptoms of TB and that TB is curable after 6 months of complete treatment. He also told that TB diagnosis and treatment is available free of cost throughout the country at health facilities established by the government.

The objectives of the campaign/ quiz competition are

- To collaborate with McDonalds in creating awareness on TB among general population and
- Have a viable long term partnership with McDonalds in the fight against TB

The following activities were carried out at McDonalds, F9 Park, Islamabad

McDonalds outlet, Islamabad was branded with banners. In addition streamers/X stands have been displayed at various visible parts of the branch. For chain of awareness regarding Tuberculosis, information material (Having messages of TB) have been distributed among all the visiting customers and participants of the quiz competition.

While quiz competition, a questioner comprising questions related to symptoms and general information about TB has been developed and shared among the costumers at the branch. Those participants with correct answers have been provided with a free a meal. The outlet granted a total number of 15 free meals and supported NTP team with human resource while branding and distribution.
City Branding:

All major areas of the Federal capital city were branded with streamers and banners comprising of TB messages. The diverse streamers all around the city broadened the voice of National TB Control Program “join hands together for a TB free Pakistan”.

Following are some snaps of the city branding:

Provincial Level Activities

A series of activities planned for provincial level to commemorate World TB Day is enclosed within along with the highlighted activities held in the provinces.

World TB Day KPK events:

Advocacy Seminar to Commemorate World TB Day

Peshawar, 25 March 2014 - An estimated 50,000 new TB cases occur in Khyber Pakhtunkhwa every year. This situation was discussed in an advocacy seminar conducted by the TB Control Programme, Khyber Pakhtunkhwa funded by the Federal Republic of Germany through KfW Development Bank. Among prominent speakers were Mr. Shaukat Ali Yousafzai, Health Minister, Mr. Ghulam Qadir Khan, the Secretary Health, Dr. Abdul Waheed, Director General Health Services, Dr. Ubaid Hussain, Project Director of TB Control Programme, Dr. Arshad Javed, Chief Executive-Lady Reading Hospital, Peshawar addressing the participants to highlight the importance of World TB Day. The seminar was attended by Dr. Masuma Zaidi, Project Coordinator, KfW Development Bank, Dr. Abdul Ghafoor, Senior Project Coordinator Global Fund, Dr. Hadi, Deputy Manager, National TB Control Program, the health department KP Health experts from tertiary care and parastatal hospitals, donor agencies and implementing partners of the Provincial TB Control Program, experts on TB and chest diseases and civil society.

While commending the efforts of the TB Control Program, the Secretary Health appraised the forum by saying “though the Provincial TB Control Program has achieved a treatment success rate of 94% which is in line with the World Health Organization’s recommendations, achieving the targets is not the end of the journey, rather a commitment that we still need to go a long way to control TB. The availability of anti-TB drugs and trained and motivated human resource at the diagnostic and treatment centers are encouraging but to sustain the achieved targets, we must continue with the same spirit and improve the quality of services”. In 2013, TB Control Program Khyber Pakhtunkhwa was able to register 38803 patients with a 94 % treatment success rate. He also thanked the German Government for the support provided through KFW Development Bank for TB Control Program.

Dr. Ubaid Hussain, the Project Director, TB Control Program informed the audience that with the German Government support, free of cost provision of anti-TB drugs had been initiated to TB patients seeking treatment from private health clinics in selected districts.

The Secretary Health also distributed shields of acknowledgement among professionals for their contribution to control TB in the province. He acknowledged the support extended by National TB Control Program, KFW, WHO, GFATM and GIZ for their continued assistance and thanked other partners who contributed substantially in case finding and case holding of TB patients in the province.

Like previous year, District TB Control Program Malakand celebrated “World TB Day” with great pomp and show this year as well. World TB Day is an opportunity to raise awareness about the burden of tuberculosis worldwide and the status of TB prevention and control efforts. The Day is also an occasion to mobilize political and social commitment for further progress.

Two events were conducted for this purpose in the district:

**STOP TB Football Match.**

A friendly Football Match was played among Batkhela White Football Club Batkhela and Mubarak 11 Football Club Chakdarra, District Dir Lower on March 23, 2014 at Batkhela. The result was decided on Penalty shoot outs as it was ended as drawn in the stipulated time. Batkhela White Football Club won the Match by 4:2.

Mohammad Imran Khan, Additional Assistant Commissioner Batkhela, was the chief guest on the occasion and both the teams were introduced to him. Banners and posters having awareness slogans were displayed in the ground. Leaflets/brochures were also distributed among all the players and spectators. Although it was a rainy day, but it was attended by a large number of people including elders of the area, students, social workers, football fans, media persons etc. Light Refreshment was also offered during half-time.

This whole activity was financially supported by a local Literary and Social organization “Mrastyal Likwal – MAL Malakand”. Trophies, Shields and Certificates were distributed among the teams and Match Management Committee.

**Brief Summary of “World TB Day – March 24, 2014” Events in District Malakand.**

Like previous year, District TB Control Program Malakand celebrated “World TB Day” with great pomp and show this year as well. World TB Day is an opportunity to raise awareness about the burden of tuberculosis worldwide and the status of TB prevention and control efforts. The Day is also an occasion to mobilize political and social commitment for further progress.

This whole activity was financially supported by a local Literary and Social organization “Mrastyal Likwal – MAL Malakand”. Trophies, Shields and Certificates were distributed among the teams and Match Management Committee.

**STOP TB Seminar.**

A Seminar by the name of “STOP TB Seminar” was also organized by District TB Control Program Malakand with the moral and financial support of International Human Rights Organization Malakand on April 1, 2014 at Rahman Paramedical Institute Batkhela. A large number of people including Elders of community, local political leaders, local religious leaders, members of civil society, Teachers, Students, press people and trade unions etc. attended the seminar. Banners and posters were displayed and leaflets and booklets having information and health messages were distributed among the participants.

Through simple presentation by multimedia, they were briefed by myself regarding current status of TB Cases globally and Nationally. They were also briefed about TB status in the district and services provided by the District TB Control Program. They were reminded their roles and responsibilities in combating this dreadful disease and supporting TB Control Program by disseminating these health messages and information about the network established in the district for free of cost services of investigations and treatment in the designated Health Facilities.

Mr. Mehboob-ur-Rahman, President International Human Rights Organization, also spoke on the occasion lauding the free of cost services provided by the Govt and re-it treated such like support from his organization. He also suggested provision of food packages and services of Psychiatrist for TB patients as mostly they are poor and debilitated and need counseling because of mental stress and lengthy treatment.

Honourable Mr. Nasrullah Khan, Assistant Commissioner Malakand chaired the seminar and appreciated the role of District TB Control Program Malakand in provision of Free Diagnostic and Treatment Services to TB patients. He urged the participants to support the Govt. in this noble cause by spreading these health messages and services provided so that all suspected TB cases can be identified, investigated and treated properly and well in time.

Seminar ended with vote of thanks and light refreshment for the participants.
TB Awareness Campaign at Khyber Medical College (KMC) Peshawar:

TB Awareness campaign at Khyber Medical College was a joint venture by TB Control Program, Green Star and KMC which was arranged on 19th March 2014 at KMC. The students of KMC warmly participated in all the events with enthusiasm. A poster competition was arranged among students of the college. The students painted some thought provoking posters in relation to the plight of poor TB patients, their social and economical conditions as well as stigma and discrimination. TB Control Program distributed certificates of distribution among students who took part in the poster competition.

The poster competition was followed by an awareness session on TB which was attended by more than 150 students and professors of KMC, officials of TB Control Program and its partners. The awareness session was conducted by Provincial Manager-GFATM. Prof. Dr. Meher Taj Roghani (Special Assistant to CM, KPK for Social Welfare Department) was chief guest on this occasion who highlighted the importance of TB control among other key challenges to the field of public health in Khyber Pakhtunkhwa.

The students of KMC also conducted TB awareness walk in the vicinity of KMC. Students and officials of TB Control Program and its’ partners displayed some key messages regarding TB on banners and posters to highlight the significance of Dr. Robert Koch’s discovery of M. Tuberculosis, the bacteria that causes TB.

ADVOCACY WITH PROVINCIAL POLICY MAKERS:

Date: 26th March 2014
Venue: Sheraz Hotel Peshawar

As part of the TB awareness campaign, the Provincial TB Control Program Khyber Pakhtunkhwa arranged an advocacy session for policy makers at Sheraz Hotel, Peshawar on 26th March 2014. The ACSM Coordinator and Social Scientist of TB Control Program facilitated the session.

Among key policy makers, the Additional Secretary Health (Dr. Anees Akhtar), Chief Planning and Development (Mr. Sher Gul Safi), Mr. Hafeez Ahmed (Planning Officer), Director General Health Services (Dr. S. Abdul Waheed Burki), Project Director (Dr. Ubaid Hussain), Provincial Manager GFATM (Dr. Maqsood Ali Khan), Provincial Technical Officer (Dr. Aamir Rafiq) and coordinators of TB Control Program attended the session for their valuable input and guidance.

The Project Director welcomed all participants for their presence. Dr. Maqsood Ali Khan presented an overview of the program and an introduction to TB in Khyber Pakhtunkhwa. The Project Director also presented bills of ‘TB as notifiable disease’ and ‘over-the-counter sale of TB drugs’ which was discussed at length by the additional secretary health. The additional secretary health advised to take up these bills with the Minister Health after preliminary work so that the bills could be presented for legislation.

Mr. Aftabullah Khan (Social Scientist) briefed the forum on the ACSM strategy which is developed to assist in the development, implementation, monitoring and evaluation of ACSM activities to influence behaviors and mobilize communities to create long term normative shifts towards desired behaviors. The strategy includes practical guidelines which are being developed jointly by EPOS Health Management and the Provincial “Tuberculosis Control Program, Khyber Pakhtunkhwa supported by the Government of Pakistan and KFW (German Development Bank).

For uniform implementation of ACSM strategy across all districts of Khyber Pakhtunkhwa, the first part of the ToT workshop has been conducted with District TB Officers of all districts. One of the strong recommendations of the workshop expressed by the Director Health Services was to conduct a KAP survey for collecting baseline information on ACSM on urgent basis.

Mr. Bashar (ACSM Coordinator) presented an introduction to the ongoing KAP study on Knowledge, Attitude and Practice (KAP) for TB which is part of the Advocacy, Communication and Social mobilization (ACSM) strategy to collect baseline information on the subject.

RH-AID is a research firm assigned to conduct the said study in Khyber Pakhtunkhwa. The team of RH-AID has collected data in four districts of Khyber Pakhtunkhwa including Charsadda, D. I. Khan, Abbottabad and Lower Dir to estimate and gather baseline information on the knowledge, attitudes and practices of general and specified population related to TB. The data has been collected from general population through household questionnaire whereas for qualitative data, focus group discussions with both male and female TB Patients, healthcare providers/community based treatment observers, LHWs, District Health Authorities, NGOs/CBOs and community Influential (Political, Religious Leaders, Journalists, Teachers, Students).

A question and answer session was also conducted jointly by ACSM Coordinator and consultant for KAP which was followed by remarks of the Additional Secretary Health (Dr. Anees Akhtar). While highlighting the importance of research studies, the Additional Secretary Health appreciated the program for conducting KAP study for TB and assured of all possible support to the program for scaling up quality research studies in future.

The Director General Health Services stressed the need to maximize community awareness on TB. He directed the program to arrange a dissemination workshop to share findings of KAP study as soon as the final report is submitted. He also emphasized that the findings of KAP study should be properly incorporated to the ACSM strategy. The DGHS also appreciated the program for conducting KAP study for TB and assured of all possible support to the program for scaling up quality research studies in future.

A press conference was conducted by the Provincial TB Control program, Khyber Pakhtunkhwa on 18th March 2014 with support of ACD to create awareness about the status of TB prevention and control efforts in Khyber Pakhtunkhwa. The press conference was arranged at press Club, Peshawar. Amongst the prominent speakers, Dr. Ubaid Hussain (Project Director), Dr. Maqsood Ali Khan (Provincial Program Manager-QFATM) Dr. Akmal Naveed & Dr. Abdul Latif (ACD) highlighted key issues about TB and new initiatives taken by the program.

While updating the gathering, Dr. Ubaid Hussain (Project Director) informed that during 2013, the program was able to register 36803 patients with 94 % treatment success rate for the registered TB patients. Quality assured anti-TB drugs and diagnostic facilities are provided free of cost. Since its inception in 2002, the program has registered and successfully treated approximately 331969 TB patients till December 2013.

The Provincial TB Control Program has laid the foundation of state of the art Bio Safety Level-III Laboratory at Hayatabad Medical Complex, Peshawar which is a vital initiative in health sector of Khyber Pakhtunkhwa supported by German Government. Bio Safety Level-III Laboratory will be the most advanced diagnostic facility for TB in the province wherein wide range of tests including Drug Susceptibility Testing (DST), Culture and diagnosis through GeneXperts will be performed. Khyber Pakhtunkhwa is also the leading province in terms of functionalizing 10 GeneXpert sites. Sample transportation mechanism to these sites is ensured through OSC.

Programmatic Management of Drug Resistant TB (PMDT) is initiated at Lady Reading Hospital (Peshawar), Ayub Teaching Hospital (Abbottabad), Mufti Mahmood Memorial Teaching Hospital (Dera Ismail Khan) whereas, the 4th PMDT site has also been established at Saidu Teaching Hospital, Swat. Currently, 400 MDR patients are supported by Global Fund and 200 Patients are being enrolled through EPOS including SLDs (Second Line Anti-TB Drugs) and Social support.

The drug store/warehouse has been strengthened as a state of the art warehouse of the province which is the best warehouse among other provincial TB control programs in Pakistan. Warehouse and Drug Management Systems (TB-DMIS) are also launched.

The Project Director also shared that the Program has initiated a KAP survey on knowledge, attitude and practices of general population as well as of TB patients by using both qualitative and quantitative methods to find out the existing Knowledge, Attitude and Practices (KAP) of general population and TB patients. The Advocacy, Communication and Social Mobilization (ACSM) strategy is developed to assist in the development, implementation, monitoring and evaluation of ACSM activities to influence behaviors and mobilize communities to create long term normative shifts towards desired behaviors.

Programmatic Management of Drug Resistant TB (PMDT) is initiated at Lady Reading Hospital (Peshawar), Ayub Teaching Hospital (Abbottabad), Mufti Mahmood Memorial Teaching Hospital (Dera Ismail Khan) whereas, the 4th PMDT site has also been established at Saidu Teaching Hospital, Swat. Currently, 400 MDR patients are supported by Global Fund and 200 Patients are being enrolled through EPOS including SLDs (Second Line Anti-TB Drugs) and Social support.

The drug store/warehouse has been strengthened as a state of the art warehouse of the province which is the best warehouse among other provincial TB control programs in Pakistan. Warehouse and Drug Management Systems (TB-DMIS) are also launched.

The Project Director also shared that the Program has initiated a KAP survey on knowledge, attitude and practices of general population as well as of TB patients by using both qualitative and quantitative methods to find out the existing Knowledge, Attitude and Practices (KAP) of general population and TB patients. The Advocacy, Communication and Social Mobilization (ACSM) strategy is developed to assist in the development, implementation, monitoring and evaluation of ACSM activities to influence behaviors and mobilize communities to create long term normative shifts towards desired behaviors.

**WORLD TB DAY AJK 2014 EVENTS**

24th March is World TB Day and it’s a day that provides the opportunity for affected persons and the communities in which they live, governments, civil society organizations, healthcare providers, and international partners to call for further action to reach people who have been infected with TB. Azad Jammu & Kashmir (AJK) carried out various activities and seminars in full swing.

In order to create community awareness regarding TB mission, TB messages were sent through local TV channels of Muzaffarabad (Capital and City channels) in which the messages were spread regarding treatment and curing of all TB cases which may eventually lead to elimination of this disease.

**Advocacy seminar**

An advocacy seminar was arranged on 24th March 2014 at Sangam Hotel Muzaffarabad, to create mass awareness on this disease and to pay tribute to Dr. Robert Koch for his discovery of Mycobacterium Tuberculosis in 1882. Speaking on this occasion the Director CDC/ Provincial Manager AJK Dr Khawaja Shabbir Ahmed Dar briefly explained the present TB situation in AJK and gave presentation regarding the updates of TB activities in AJK. In his presentation he highlighted the point of zero deaths from TB through accomplishing targets by “DOTS” and discussed the strategy 2020. Basharat Mughal General Secretary Press club Muzaffarabad also addressed and emphasized on strong coordination among media and TB control program. The chief guest Dr Rasheed Director Administration Health AJK said that controlling TB is top priority of the Health Department AJK. The department is committed to combat this epidemic by devoting all resources to reduce the socio-economic burden placed by this disease upon families and communities. This can only be achieved with our full motivation and commitment.

**Media press Conference**

Media press Conference was organized at the Press Club Muzaffarabad in which major journalists were invited. Director CDC / Provincial Manager AJK Dr Khawaja Shabbir Ahmed Dar chaired the conference along with Dr Nazeeraullah M&E Officer AJK, Shabbir Akhtar LFO & Shaiikh Mehboob Senior Scientific Officer AJK. He briefed the present situation of TB in AJK and measures been taken to control it with the support of National TB Control Program Pakistan. He suggested that there should be a strong coordination between TB control Program AJK and Media Personnel. In the end question & Answers session was conducted.

Activity Report of World TB Day 2014 at District Jacobabad

Public Walk:
Under the kind supervision of Dr. Abdul Karim Shaikh (Deputy Director TB control program Larkana division) & Dr. Channa (DHO, Jacobabad) a public rally was arranged at District Head Quarter Hospital Jacobabad on 29th March 2014. Around 200 participants from various walks of life gathered in early hours of the day at the entrance ground of DHQ Hospital & started to move at 10:00 am from DHQ Jacobabad. Having walked for approximately 500 metres all the participants finally reached at Town Hall Jacobabad. Doctors, paramedics, media workers, teachers, students of Male nursing school, laborers, patients, social workers participated in a very huge number.

Dr. Wajid led the walk at very front with a megaphone in his hands. Throughout the entire route he was repeatedly announcing that TB is a completely curable disease. National TB control program is providing all the diagnostic & treatment facilities to the residents of district Jacobabad at Public & private hospitals with no cost.

After the walk finished at Town Hall, all the participants gathered inside the hall where a Seminar was arranged.

Seminar:
The seminar started at 11:00 am. It was chaired by honourable Dr. Ismat Ara Khurshid (Director TB control programme, Sindh) with guest participants; Dr.Amanullah Ansari (PTO, Sindh), Dr.Ghulam Muhammad Channa (DHO), Dr. Gul Muhammad Burio, Dr. Saleem Hassan Kazmi (NPO), Dr. Muzafar Ali Khoocharo (NPO), Capt. Dr. Shahid Hussain Khokhar (NPO). Among other dignitaries were ,Principal Midwifery School, Principal Male Nursing School, DSM-PPHI, District president PMA, District coordinator National program etc. The worthy Deputy Commissioner Jacobabad Mr. Shah Zaman Khuho graced the event as Chief Guest.

The seminar started with recitation of verses from Holy Quran & a Na’t Shirif was also recited by one of the participant. This was followed by the welcome speech of Dr. Gul Muhammad Burio (Chest Specialist). Later on Dr. Amanullah Ansari gave a detailed presentation to the forum over multimedia. He presented the data of TB cases currently present globally, nationally with a special reference to district Jacobabad. He also put a brief comparison of prevailing situation of TB in Pakistan with it's comparison in early 90s. He further discussed all the challenges being faced by Provincial TB control Program & suggested that fighting TB is only possible with dedicated & selfless team efforts. He concluded his session by saying that eradicating TB is no more a dream & that day is not very farther when we shall have not a single person diseased with TB.
Activity Report of World TB Day 2014 at District Kamber Shahdadkot

Low awareness about availability of free treatment hampers TB control efforts
TB infections are especially hard to diagnose in children because the infection looks different in children than adults. 14

The disease is caused by bacteria that typically attacks the lungs and is often spread through the air when people who have an active infection cough.

Tuberculosis typically attacks the lungs and is spread through the air when people who have an active infection cough.

“In kids, you are much more likely to have TB disease in other parts of the body, not necessarily in the lungs,” Jenkins said. Even when children do have TB in their lungs, there are fewer TB pathogens present, “making kids with TB invisible” to current diagnostic methods, she said.

To arrive at their estimates, Jenkins and colleagues scoured publicly available databases and devised a way to correct for chronic underreporting of TB in children.

“What we found was that whereas previous estimates for the total number of TB cases in kids were about half a million, when you account for (underreporting) in your estimates, it’s more like 1 million children develop active TB disease every year,” she said.

The World Health Organization estimates that 8.6 million people developed TB in 2012 and 1.3 million died from the disease. According to the WHO, half a million people became sick with dangerous superbug strains of tuberculosis in 2012, it estimates that up to 2 million people worldwide may be infected with drug-resistant TB by 2015.

Keeping track of TB rates in children is important for two reasons, Jenkins said. First, children with drug-sensitive forms of TB generally respond very well to treatment. Second, because TB disease develops very quickly in children, often within weeks of exposure, finding an infected child can offer key clues about TB transmission within a community.

“That’s telling you you’ve got some kind of system failure going on there,” Jenkins said.

She said the findings illustrate the need for better methods of collecting data on childhood TB, including better diagnostics and more systematic data collection.

Medical Review

A leading medical Magazine of Pakistan published a special supplement on World TB Day 24th March 2014, which highlighted the performance of National TB Control program during the last year. It also featured the exclusive interview of Dr. Ejaz Qadeer, NPM NTP.
