

Position: PSYCHOLOGIST

Key responsibilities

- Identify individuals who know they are HIV-positive but are not in HIV medical care by receiving referrals, utilizing organizational information about missed appointments, and conducting outreach at various community organizations and venues.
- Responsible to work and build the trust and confidence of clients especially victims of domestic based violence women.
- Provide accurate information to clients about living with HIV, preventing further transmission, the benefits and challenges of HIV care and treatment, and available services and how to access them.
- Provide personalized assistance to clients to help them enroll or re-engage in medical care.
- Support clients throughout the early part of their care so they participate fully, become educated, and can advocate for themselves.
- Help clients to develop confidence about their participation in HIV treatment.
- Assist clients in identifying services to address other aspects of their life that affect their health, such as mental health and substance abuse treatment, domestic violence services, housing programs, and education and employment services.
- Facilitate support groups and ensure client linkage to psychosocial support.
- Comply with all program protocols, including those regarding confidentiality of client information
- Participate in all staff and program meetings, site visits, required network events, and mandatory trainings.
- Keep supervisor informed of all problems, challenges and conflicts related to job.
- Perform other duties as assigned by the management.
